Portfolio

Education

Bachelor's degree Engineer-developer

Belorussian National Technical University

2000 – 2006, Minsk

Languages

English (B2)

Belorussian

Russian

Tools

- **Figma (Advanced)**
- **Adobe Creative Suite**
- **Prototyping tools (InVision, Principle)**
- **Google Analytics**
- **Sketch**
- **AI tools for design (Midjourney, ChatGPT, Claude, etc.)**
- **KeyShot & ZBrush**

Skills

- **Ideation & User Flows**
- **Information Architecture**
- **Interaction & Micro-interaction Design**
- **Wireframing & Prototyping**
- **Design Systems**
- **User Research & Usability Testing**
- **UX Strategy & Product Thinking**
- **AI-Assisted Design**

HardSkills

Design Process

- Ability to select the most effective approach to solve complex design problems
- Streamlined and flexible design process with quick adaptation to team needs and product requirements
- Strong adherence to deadlines while maintaining high quality in a fast-paced environment

Core Design Skills

- UX Design & User Research
- Design Systems and component-based architecture
- High-fidelity Prototyping
- AI-Driven Design
- Accessibility (WCAG standards)
- UX Testing & Usability Validation
- Advanced Figma (Auto Layout, Variants, Interactive Prototypes)

Product-Centered Approach

- Working with product metrics (activation, retention, engagement, conversion)
- Conducting user research and turning insights into actionable design solutions
- Understanding business goals and translating them into user-centered interfaces
- Deep focus on user problems and long-term value creation

Communication Design

- Creating clear, expressive, and consistent visual language
- UX Copywriting and microcopy
- Building intuitive user communication through the interface
- Mobile-first design principles and best practices

SoftSkills

Communication

- Transparency in design process and decision-making
- Clear and timely stakeholder communication
- Ability to run productive meetings and facilitate constructive discussions

Team Collaboration

- Giving and receiving constructive feedback without conflict
- Finding balanced compromises and maintaining positive team dynamics
- Contributing to team productivity and process improvement

Independence & Ownership

- Proactive idea generation and independent problem-solving
- Strong ownership of design decisions and outcomes
- Critical thinking — asking "Why?" and challenging assumptions when needed

Leadership

- Inspiring and supporting team members
- Identifying and implementing best practices
- Ability to scale design processes and contribute to product growth

Experience 2006 – 2026

UX Architect B2B SaaS Systems | Fintech Back-Office & Admin Panels | Redesigning Legacy Interfaces

Softswiss

~7 years 2019-2026

App Wireframing/Architecture, CX design, Design Research, Interaction design. SaaS Design

Project from skratch, Inner UX Webinars, UX Casino Testing, Customer/Stakeholder Surveys

Projects: Softswiss platform, Jackpot platform, PSP backoffice, Payment platform, N1 products

Key achievements& improvements:

- +35% faster task completion
- 28% reduction in support queries
- improved onboarding completion by 30–45% for non-technical users
- Reduced manual jackpot configuration time from 30–60 min to 2–4 min per campaign
- Enabled handling 5–10× more active jackpots without performance drop or added staff
- increased daily processed jackpot events per admin by 45–75%
- Decreased human-error rate in jackpot rules setup by 55–72% via guided conditional builders andvalidation previews
- Conducting webinars for cross teams collaboration (democratization UX research process)
